	<b>HAL MAPAs' Aggregate **</b>				<b>(2.24)</b>						

\* The first full set of 2019 Account estimates are produced at 2020 Q1. Only Hiscox published earlier at 2019 Q4 whilst TMK have included a Q4 position alongside the 2020 Q1 estimate.

\*\* The HAL Overall and MAPA estimates will be included when a full set of syndicate estimates are available.

\*\*\* Syndicates 1910, 1492, 3268 & 3330 are included in the aggregate of non- third party.

All results and estimates are stated as a percentage of capacity after standard personal expenses and before members' agents' fees.

The guideline period end exchange rate for US dollars advised by Lloyd's for the 2020 Q1 syndicate returns is \$1.24 to £ and for 2019 Q4 is \$1.32 to £.

**Past performance should not be seen as an indicator of future performance. Underwriting at Lloyd's involves a significant degree of risk and those investing in the market will be exposed to the risk of underwriting losses and they will remain ultimately liable for losses until the liabilities of all syndicates participated upon have been reinsured to close, subject to there being no reinsurance failure.**

**Underwriting Membership may not be suitable for all, and if there is any doubt, independent advice should be sought.**

**Capital invested is at risk as it is exposed to underwriting losses. If Funds at Lloyd's are used to settle losses, this could impact on a Member's premium limit.**
